Technology for Board Governance and Membership Management Unveiled at Educational Leaders' Conference

Two new technology products – one to revolutionize the way governing boards access information and data, and another product that provides innovative solutions to membership and database management – were introduced at the Georgia School Boards Association Summer Conference and Delegate Assembly in Savannah, Georgia, on Friday, June 22.

eBOARDsolutions, Inc., introduced its flagship products eBOARD and eMEMBERSHIP to more than 654 educational leaders meeting in Savannah.

eBOARD assists governing boards with managing meetings and information more effectively by: being one source for meeting agendas, policies, documents, news, calendars, research and more; providing a single user log in, being easy to use, providing advanced search features for quick access to data, and providing a cost savings over traditional board meeting packets.

eMEMBERSHIP assists association in managing a variety of membership and meetings needs including: a streamlined data input system, multiple reporting capabilities, simplified event registration process, automated invoice and invoice reminders process, member information and demographics management and e-mail, fax and postal communications system.

The products are in use by more than 150 of 180 local boards of education in Georgia, and by numerous boards and/or associations in Alabama, Florida, Mississippi, New Jersey, North Carolina and South Carolina.

Please go to www.eboardsolutions.com for more information about the company and its products.
