Georgia's School Boards Named Winners of Tech Solutions Grants

The Georgia School Boards Association (GSBA) has named the recipients of technology grants made available from funding by the Georgia Department of Education and Georgia Power. The grants will provide the systems with one or more of three technology solutions. The three technology solutions are: GSBA eBoard, GSBA ePolicy and GSBA eLaw. GSBA eBoard is an online paperless board meeting solution. GSBA ePolicy is an online policy manual solution. GSBA eLaw is an online law guide. Along with the products, school systems will receive the training necessary to fully access and implement the technology solutions. These tools are a part of GSBA's eSolutions family of products and services. This year's grant recipients are:

Grants from the Department of Education

- Catoosa County – receiving ePolicy
- Commerce City – receiving eBoard, ePolicy and eLaw
- Dublin City – receiving eBoard
- Glascock County – receiving ePolicy
- Griffin-Spalding County- receiving ePolicy
- Habersham County – receiving eBoard
- Hart County – receiving eLaw
- Pulaski County – receiving eBoard
- Randolph County – receiving ePolicy
- Savannah-Chatham County – receiving eBoard
- Taliaferro County – receiving eLaw
- Troup County – receiving eLaw
- Twiggs County – receiving eLaw

Grants from Georgia Power

- Appling County – receiving eBoard
- Decatur City – receiving eBoard
- Emanuel County – receiving eBoard
- Houston County – receiving eBoard
- Laurens County – receiving eBoard
- Lumpkin County – receiving eBoard

All recipients were required to have met GSBA's Standards for Local Boards of Education. Other factors that were also considered included being a board that uses other GSBA technology solutions, being a low-wealth school district, having achieved the GSBA Board of Distinction level and winning a National Digital School Board Award.

Georgia School Boards Association Executive Director Jeannie M. (Sis) Henry said, "GSBA gratefully acknowledges the Georgia Department of Education and Georgia Power for assisting us with making this technology available to these boards. These tools enhance local governance by assisting boards in their policy-making and decision-making roles."
